

Clay Wright

2025

Clay is a scholar and teacher of classical dressage. His patient, clear and thorough way of teaching helps people and horses relax and absorb the lessons of balance and refinement. Participants will gain confidence and learn how to perform to their maximum potential by learning how to understand the 'intelligence' of the heart of the horse.

The true essence of the horse and nature are one. Each reflects the other. Yet, the horse as well as nature are both light and dark. Clay Wright works with the horse in this realm. You can learn to do the same. For working within this realm is what is truly effective and understandable to the horse, without destroying the horse's true nature.

Come and learn to be real with your horse and stop the concepts and myths that do not really work. Clay shows, teaches, and reveals. Then encourages you to do the real work together with your horse.
